

Fallen leaves provide food and shelter for critters like butterflies, bees, moths, beetles, and more! One of the best ways to help pollinators is to...

# Leave the Leaves!

The critters that live in the leaves provide food for birds, salamanders, turtles, and chipmunks!

Luna moths disguise their cocoons as dried leaves, blending in with real leaves!

Some butterflies lay their eggs on fallen leaves. These eggs will hatch in the spring!

Bumble bee queens will burrow in the leaves and soil to hibernate for winter.

Can you find these things in the leaf pile?

- Worm
- Caterpillar
- Moth
- Grasshopper
- Cocoon
- Acorn
- Ant
- Bee
- Insect eggs
